

Be brilliant today

Bexhill Academy Mathematics

Be the best you!

Key Stage 3 Curriculum 24-25

Our Intent:

We will make sure that every child becomes a brilliant Mathematician, developing the Mathematical skills, Mathematical Literacy and problem solving ability that is vital to their success in their individual futures.

Every child is expected to master the key Mathematical concepts and we continuously strive for all students to excel within Mathematics.

Our new structure ensures a common theme is taught in each year group across a term and topics are continuously interleaved within new contexts as students progress through the years.

We have custom built our curriculum, for our students which includes a full range of opportunities to provide enrichment and prepare students for the future they deserve.
